Dear Mr. Boing:

RE: Sporlan Valve Company
St. Louis, Missouri
EPA I.D. # MOD006299200

The Environmental Protection Agency (EPA) hereby terminates Resource Conservation and Recovery Act (RCRA) interim status for the above referenced facility. This action is taken in consideration of your letter and certification October 11, 1985 that there are no solid waste management units onsite at the facility. If at any time in the future it is determined that there was a release of hazardous waste into the environment any time prior to this termination of interim status action, EPA retains the right under Section 3008(h) of the RCRA as amended on November 8, 1985 to initiate interim status corrective action orders.

It is no longer necessary to maintain financial assurance for closure. If you have not already discontinued liability insurance, you may do so now. It is our understanding that Sporlan Valve Company will remain solely a generator of hazardous waste.

Please be advised that as a generator you must comply with 40 CFR 262 and the applicable parts of 40 CFR 265. Section 262.34(a) allows you to accumulate hazardous waste onsite without a permit for 90 days or less.

As a generator, the facility remains subject to inspection, and failure to comply with these Federal regulations could subject you to a Federal or State enforcement action. In addition, since you are withdrawing from interim status, you would not be able to operate again as a TSD facility unless and until you submit a Part B application and receive a permit.

If you have any questions regarding this notice, please contact Ms. Faye Sandberg of my staff at (913) 236-2852.

Sincerely yours,

David A. Wagoner
